Connect Allografts are dense corticocancellous allografts comprised of an anterior cortical face providing structural integrity while allowing immediate perfusion for rapid healing. These allografts are available in Lordotic and Non-Lordotic designs. Connect Allografts are processed from donor vertebral bodies creating homologous spinal allograft implants.

ALLOGRAFT KEY FEATURES

Vertebral Body Corticocancellous Construct

- * Anterior cortical surface maximizes compressive strength
- * Dense cancellous bone allows immediate perfusion and rapid healing

Lordotic and Non-Lordotic Implant Design

- * Different designs allow for patient-specific needs

Precise Implant Sizing

- * Range of sizes provides optimal distraction
- * Trimmable design permits customization to provide a perfect fit
- * Maximizes graft-to-host bone surface area contact promotes excellent healing

Strict Tissue Processing Standards

- * Fresh frozen implant ensures optimal mechanical strength and consistent sizing

UNIQUE INSTRUMENTATION

- * Integrated system provides ease of use and procedural efficiency.
